John Spencer @SpencerGuard

I was there yesterday. It was an impressive site. You can within hours completely change your training venue. Add streets, different types of room layouts. Targets that shoot back, record your hits. @4gdTrg is legit.

British Army @BritishArmy · Feb 15, 2021
Colchester based soldiers from 2 PARA have put their new training facility to the test. @16AirAssltBde have invested in an innovative system to help prepare their troops to operate in urban areas. #Innovation

With @16AirAssltBCT and @4gdTrg observing some of the most advanced tactical #urbanwarfare I've ever seen. Ability to combine physical and virtual (infantry/snipers/mortars/Aviation/FOs) to create the real demands of DUT. Good to be around paras @CDonahue1792 @PatDonahoeArmy

With the UK Army 16th Air Assault Brigade today observing some of the most advanced tactical #urbanwarfare I've ever seen. 4GD and the ability to combine physical and virtual (infantry clearing/ real snipers/mortars/Aviation/FOs interfacing live and virtual worlds) to create the real demands of urban operations. Good to be around paras/airborne soldiers. Very impressive concept.

Love what the 4GD team are doing here. It provides so much flexibility and possibility to urban training. #trainingsolutions #simulation #unrealengine

Incredible day at @16AirAssltBCT seeing the @4gdTrg and @D3A_Defence team collaborating for combined arms urban training. Incredible tech, bridging the gap between individual and collective training. Also great to catch up with @SpencerGuard and talk all things #urbanwarfare

If @SpencerGuard is saying that this is the most advanced tactical urban warfare he has ever seen, then they are doing something very right. Ex Coelis.
